

"Jenoptik's new microscope camera for Life Science. Get the most from your microscope workstation."

Benefits and opportunities with the new JENOPTIK PROGRES GRYPHAX SUBRA

This year JENOPTIK has launched its new product portfolio PROGRES GRPYHAX.

Jenoptik's definition of perfect digital imaging is still to provide a solution for microscope workstations.

Refine your microscope workstation based on the excellent image quality provided by PROGRES GRYPHAX cameras and take advantage of the ease of use, versatility and stability of our powerful software PROGRES GRYPHAX.

The focus of our talk is to introduce our workflow optimized and cross platform compatible software and show its ease of use. We will show new software functions and how time is saved working with a PROGRES GRYPHAX product.

Attend our workshop and see how quickly and easily you can produce a PANORAMA image of your whole slide - without the use of a motorized stage, along with many other new functions. You will also see the quality you expect from Jenoptik is present overall within the new Gryphax usb 3.0 Subra hardware and software.

The new PROGRES GRYPHAX® series will become an indispensable part of your laboratory.
